MID-SEMESTER EXAMINATION OF FIRST SEMESTER – THIRD YEAR (5TH) 2023, 20-BATCH, B.S (CS)

SUBJECT: OPERATING SYSTEMS

Dated: 13.03.2023

Maximum Marks: 20

Time Allowed: 01 Hour

NOTE: ATTEMPT ANY TWO (02) QUESTIONS. ALL QUESTIONS CARRY EQUAL MARKS.

Q. No	QUESTION	CLO	Taxonomy Level	PLO	Marks
Q. 01	(A) Explain Process Control Block, and define various pieces of information associated with a specific process.	1	C2	3	05
	(B) As a process executes, it changes its state. With the help of a diagram, define the general states of a process in its lifetime.	1	C1	3	05
Q. 02	(A) What resources are used when a thread is created? How do they differ from those used when a process is created?	1	C1	3	05
	(B) Differentiate between data and task parallelism in context to multicore programming, and use necessary diagrams.		C4	3	05
Q. 03	Write short notes on any three of the following: 1. Concurrency and Parallelism 2. System calls 3. Benefits of Multi-threading 4. Amdahl's law 5. Types of OS	1	C2	3	10

***** Good Luck *****

Q. No.	QUESTION	CLO	Taxonomy Level	PLO	Marks
Q. 01	(a) Describe the object oriented languages such as C++ and JAVA origination with comparison of language features such as Dynamic, Secure, Multithreaded, Architecture Neutral.	1	C2	2	04
	(b) What is polymorphism? What are the types of polymorphism? What is message passing in java.	2	C2	1	04
	(c) Write a program for runtime polymorphism of class A super class and B as sub class with fun1 () message(s) be called using main method.	3	P3	3	04
Q. 02	(a) What is casting? Why it is needed in java? What is syntax of casting in JAVA? Describe the difference between narrowing and widening conversion? What are relational operators in java?	1	C2	1	06
	(b) What are primitive data types in java? What is the width and ranges of integer only in java?	1	C2	1	03
	(c) Write the output of the following operators with operands int a=4,b=2; i) System.out.println(a&b); ii) System.out.println(a*b); iii) System.out.println(a b);	3	P3	3	03
Q. 03	(a) What do you mean by Constructor in java? What is overloaded constructor? What is difference between explicit and default constructor in java?	1	C2	1	04
	(b) What is String? What are different types of string in java? How String is different from Arrays?	1	C2	1	04
	(c) What is Swing? How it is different from AWT?	1	C2	1	04
Q. 04	(a) What is Math class in java? What is the type of Math class in java? Explain briefly the rounding functions of Math class java. What is output of the following i) System.out.println(Math.ceil(4.5)); ii) System.out.println(Math.floor(-2.5)); iii) System.out.println(Math.round(2.5));	1,3	C2,P3	1	04
	(b) What are decision making statements in java? What are types of loops in java? Draw the activity diagram for do while statement in java?	1,3	C2,P3	1	04
	(c) Write a program in java to display a) Numbers from 100 to 1 using for loop b) Even numbers from 1 to 100 using while loop c) Odd numbers from 1 to 100 using for loop d) Message of Hello Quest 10 times using do-while loop	3	C2	3	04
Q. 05	Write a Note on three of the following: a) The Pillars of OOP b) Identifiers in java c) Arrays in java d) Object references e) Literals in java	1	C2	1	12

The End

SUBJECT: SOFTWARE ENGINEERING

Dated: 05.06.2023

Maximum Marks: 60

Time Allowed: 03 Hours.

NOTE: ATTEMPT ALL QUESTIONS. ALL QUESTIONS CARRY EQUAL MARKS.

Q. No	QUESTION	CLO	Taxonomy Level	PLO	Marks
Q. 01 (A)	What are some commonly used techniques for requirement elicitation in software engineering, and what are their characteristics?	1	C3	2	06
(B)	How does the requirements engineering process contribute to the overall success of software development projects, and what metrics and measures can be used to assess the quality of software requirements?	1	C1	2	06
Q. 02 (A)	What are the different levels of software design, and how does modularization play a role in achieving modifiability and reusability in software systems?	2	C1	2	06
(B)	Discuss the concepts of coupling and cohesion in software design. How do high levels of coupling and low levels of cohesion impact the maintainability and testability of a software system?	2	C3	2	06
Q. 03 (A)	What are the different types of Data Flow Diagrams (DFDs) commonly used in software engineering? How are they used to represent the flow of data within a system?	2	C1	2	06
(B)	How can the integration of Structure Charts, HIPO Diagrams, and Entity-Relationship Models enhance the clarity and completeness of a system's design and documentation?	2	C3	2	06
Q. 04	What are the key differences between function-oriented design and object-oriented design as software design strategies? Explain how software design approaches can be used to guide the overall design process.	3	C3	2	12
Q. 05	How does software design complexity impact the overall quality of a software system? Discuss the concept of Cyclomatic complexity as a measure of software complexity. Explain the concept of function points, how they can be used to measure the size and complexity of a software application.	3	C4	2	12
